

AluSplash® is a low-maintenance material for the kitchen and bathroom. To keep the backpanel beautiful, proper use and regular cleaning is necessary. Below are some maintenance tips!

## 1 USE

To keep the backpanel beautiful over the years, we recommend the following:

- > Avoid using and/or striking metal or sharp objects (such as knives, pans, cans and other utensils) against the coated surface as this may cause scratches and/or dents. This is no reason for reclamation.
- > Do not clean the backpanel while it is still hot. Wait with this until it has cooled down to room temperature.
- > With a gas cooktop, make sure the flame does not come out from under the pan.

## 2 MAINTANANCE

For daily cleaning, you can wipe the surface with a cloth using mild, non-abrasive cleaning agents (such as, for example, a soak of green Dreft). Always dry thoroughly with a clean cloth; this will absorb any soap, dirt and water residues.

### Periodic maintenance

For periodic maintenance, maintain the surface with Vuplex (for high-gloss colors) or Matt Max (for Essenza and matte colors). This ensures that dirt remains easy to remove and that possible scratches become less visible. Use a microfiber cloth for this.

### Attention:

- > Never use harsh cleaners such as baking soda, paint stripper, brush, metal and oven cleaners, chlorine, sink de-stoppers or other chemicals.
- > Never use hard abrasives such as a scouring pad/steel wool/sandpaper/diamond (damage the surface).

### Vuplex

Vuplex tbv high gloss colors is suitable for daily maintenance.

This maintenance set (art.no. 290147) contains a High Gloss Protector, a microfiber cloth and instructions for use. You can order this care product online: [www.dekkerzevenhuizen.com/shop](http://www.dekkerzevenhuizen.com/shop)
